

GOURAV JAIN

Global AI-Driven Engineering Leader · Microsoft Azure MVP · Cloud Architect

Senior Engineering Manager & Head of Engineering (India) · Fintech · Travel · SaaS · Logistics · Healthcare
+91-9953573400 · gourav8jain@gmail.com · linkedin.com/in/gourav8jain · gourav8jain.github.io/portfolio

PROFESSIONAL SUMMARY

Visionary engineering leader — 17+ years scaling cloud-native distributed systems across fintech, travel, logistics, and e-commerce. Trusted advisor, pre-sales solutioning partner, and AI-native strategist: Azure OpenAI, Azure AI Foundry, RAG, LLM Integration, AI Agents, Prompt Engineering, Responsible AI, Data Science. Leader of Leaders — directs 40–100 engineers, shapes strategic roadmaps, owns OKR/KPI execution, and champions 0-to-1 innovation; translates C-suite vision into measurable revenue impact. DevEx champion driving GenAI and CI/CD modernization. Recognized Microsoft Azure MVP with 150+ articles; grows engineers into leaders and evolves products into enduring platforms.

Domains — Travel · Fintech AI & Agentic Systems · Fintech · Logistics & Supply Chain · E-commerce & Payments · Healthcare · SaaS · Consulting

TECHNICAL SKILLS

Programming - .NET / .NET Core · C# · JavaScript · TypeScript · Python · Golang · Java · NodeJS · NestJS · ReactJS · Redux · AngularJS

Databases - SQL Server · PostgreSQL · MySQL · MongoDB · Cosmos DB · Entity Framework / EF Core · Type ORM

Cloud - Microsoft Azure · AWS · GCP

DevOps - Azure DevOps · Docker · Kubernetes · Jenkins · TeamCity · CI/CD Pipelines · Terraform · Bicep · SonarQube · OpsGenie

Architecture - Microservices · Distributed Systems · Event-Driven Architecture · REST APIs · GraphQL · OAuth 2.0 · TDD / BDD · SOLID · Design Patterns

Monitoring - New Relic · ELK Stack · Prometheus · Grafana · Application Insights · Snowflake · RabbitMQ · Kafka

AI & Emerging - GitHub Copilot · Cursor AI · Claude · Azure OpenAI · Azure AI Foundry · Generative AI · AI Agents · Agentic AI · RAG · LLM Integration · Prompt Engineering · Responsible AI · Azure ML

Leadership - Strategic Road mapping · OKRs/KPIs · Build vs. Buy · Org Design · C-Suite Comms · 0-to-1 Innovation

PROFESSIONAL EXPERIENCE

iOL (Illusion Online) — Dubai · Travel & Fintech

Multi-currency travel wallet (Wallet 2.0) & payment orchestration platform (iOL Pay), driving 50%+ of company revenue across 6 countries

Senior Engineering Manager & India Engineering Head

Sep 2025 – Present

- Lead 35+ engineers across India, New Zealand, Ukraine, Poland, Dubai, and Pakistan; architect and operate Wallet 2.0 and iOL Pay on .NET Core, Golang, Azure, GCP, and PostgreSQL distributed microservices.
- Architected and delivered mission-critical fintech integrations — Checkout.com, Connex Pay, WEX, Citi, ICCP, Revolut, and Trip Link — powering seamless checkout, supplier settlement, and virtual card issuance; drove PCI-DSS certification end-to-end, embedding security and audit readiness into core delivery.
- Introduced AI PR Review agent (PR cycle time -50%), AI Page Summary agent (analyst review time -50%); engineered Azure DevOps Daily Digest agent publishing to Wiki at 7 PM IST daily (saving 2+ hrs./day); built unified DB & Elasticsearch dashboard cutting incident investigation by 60%.
- Automated Kibana alerts to Microsoft Teams across error scenarios — reduced client-facing support tickets from 5,000+ to under 100; consolidated docs in Azure DevOps Wiki, improving collaboration and traceability by 40%.
- Championed AI adoption (Claude, Cursor AI, GitHub Copilot) driving 25% productivity uplift; redesigned hiring through competency-based role mapping and structured interviews — 35% efficiency improvement; authored 100+ technical articles reinforcing global engineering thought leadership.

Delhivery — India · Logistics & Supply Chain

India's leading logistics unicorn; scaled engineering across payout, slot booking, and attendance management platforms

Senior Engineering Manager

Nov 2024 – Sep 2025

- Directed 30+ engineers and 3 leads to scale payout, slot, and attendance services, improving scalability and availability by 40%; launched ACKO integration and slot templating, enhancing payout accuracy by 30% and reducing manual escalations by 50%.
- Reduced CI/CD pipeline execution time by 45% through build optimization, containerization, and parallel job execution (GitHub Actions, Azure Pipelines); led Python 3.11 upgrade and infra right-sizing, achieving 20% cost savings.
- Enabled 99.98% uptime via proactive Kibana/Slack/OpsGenie observability dashboards and automated incident response; improved developer onboarding time by 50% through self-serve internal tools and structured documentation

Novo — US-Based Fintech

Cards, lending, payments, and core banking infrastructure contributing to 95% of \$50M annual revenue

Group Engineering Manager / Director of Engineering

Jan 2023 – Nov 2024

- Directed 47+ member team and 4 managers across cards, lending, payments, and rails — contributing to 95% of Novo's \$50M annual revenue; owned full technical roadmap for core banking and payment infrastructure with 99.99% uptime SLA.
- Delivered end-to-end debit and credit card features integrating Taktile, Lithic, Sardine, PPP, and Twilio, reducing time-to-market by 25%; architected money movement platform using Golang, Postgres, and AWS with Python-based A/B testing.
- Championed Shopify and Stripe integration boosting user engagement by 212%; integrated Wise, Mitek, and Wausau into the checking product, improving customer satisfaction by 20% and onboarding by 35%.
- Led DevOps transformation from monthly to daily deployments (Azure DevOps, Docker, Kubernetes), cutting release time by 60%; deployed company-wide ELK/APM/OpsGenie observability, achieving 112% reduction in support tickets.
- Revamped onboarding, lifting satisfaction scores from 42% to 78% and reducing churn by 30%; established career ladders and L&D programs improving team engagement by 40% and operational efficiency by 25%.
- Championed quarterly OKR reviews and engineering all-hands aligning 47+ engineers to company-wide priorities; scaled the team by 35% in 12 months through structured hiring, competency-based onboarding, and mentorship — maintaining delivery velocity throughout.

Bold — US-Based E-commerce · Shopify Apps

Payment services engineering and .NET Core platform modernization across 5 critical commerce services

Engineering Manager

Apr 2021 – Jan 2023

- Led 15+ member engineering team architecting 5 critical payment services — risk management, subscriptions, and notifications — using .NET Core, Java, ReactJS, Azure, and SQL; delivered successful .NET to .NET Core migration, enhancing performance, scalability, and maintainability.
- Integrated Adyen, Stripe, and Shopify payment gateways into the e-commerce platform; aligned technical architecture with product vision across cross-functional stakeholders; authored 40+ articles on Microsoft and open-source technologies.
- Established engineering quality and delivery rigor through SonarQube gates, New Relic observability dashboards, and structured code-review processes — achieving 99.95% platform availability and cutting MTTR by 40%; mentored engineers through bi-annual performance cycles, advancing 3 engineers to senior roles.

Stryker · IGT · Fiserv · Nagarro · Xebia Group (McKinsey)

Enterprise engineering leadership across HealthTech, FinTech, gaming, e-commerce, and McKinsey consulting

Senior Technical Lead → Technical Lead

Jun 2010 – Apr 2021

- At Stryker (HealthTech): led 10+ engineers delivering enterprise .NET Core / ReactJS / Azure applications; built a COVID-19 risk assessment tool reducing clinical triage time by 40%, and a knee implant surgery visualization POC using Unity 3D and Blender, adopted across surgical teams.
- At Xebia Group (McKinsey): architected microservices platforms (.NET Core, Docker, Kubernetes, SQL Server) for McKinsey & Company, reducing system latency by 50%; drove digital transformation across fintech (Fiserv), gaming (IGT), and e-commerce (Nagarro) domains, cutting deployment times by 55%.
- Microsoft Certified Trainer (2018–2019); authored 100+ technical articles on Azure, .NET Core, SonarQube, and DevOps — establishing global thought leadership across Microsoft and open-source engineering communities.

CERTIFICATIONS

AI-100: Azure AI Associate (2021) · AZ-900: Azure Fundamentals (2020) · Exam 532: Developing Azure Solutions (2018)
MCSD: App Builder — Certified 2018 · MCSA: Web Applications — Certified 2018 · Microsoft Certified Trainer (2018–2019)

EDUCATION

B.Tech — Computer Science | Guru Gobind Singh Indraprastha University (GGSIPU), Delhi | 2010

AWARDS & COMMUNITY LEADERSHIP

- Inducted into the Microsoft Azure MVP (Most Valuable Professional) program — collaborated directly with Microsoft product teams on Azure initiatives, represented Microsoft at conferences, and drove community awareness through 100+ published blogs and articles.
- Organized and hosted Global DevOps Camp 2018 (Delhi) and 30+ technical conferences across India and internationally; active speaker on Azure, .NET Core, AI-driven development, SonarQube, and DevOps — inspiring innovation culture globally.
- Author of 'Understanding Azure: A Beginner's Guide' — enterprise-adopted reference guide for Azure onboarding journeys; Founder of the Microsoft & Cloud Enthusiasts Meetup, building a community of 500+ engineers across India's technology ecosystem.
