

GOURAV JAIN

Strategic Engineering Leadership | Platform & Cloud Architecture | AI-Native Transformation

Microsoft Azure MVP · Full Stack & Cloud Architect · AI & DevOps Evangelist · Fintech, Travel & SaaS

+91-9953573400 | gourav8jain@gmail.com | linkedin.com/in/gourav8jain | gourav8jain.github.io/portfolio

EXECUTIVE SUMMARY

Strategic engineering leader with 17+ years building world-class platforms and scaling high-performing engineering organizations of up to 100 members across travel, fintech, logistics, e-commerce, and healthcare, with deep expertise in full-stack development and cloud-native architecture. Evolves products into API-first, microservices-based platforms with scalable engineering foundations that support high-scale, high-availability workloads at 99.9%+ uptime, with strong data security across distributed and cloud-native systems. Acts as the bridge between business strategy and technical execution, translating strategic goals into actionable OKRs and KPIs, owning build vs buy decisions, and aligning roadmaps to revenue growth, operational efficiency, and platform modernization across B2B, B2C, and B2B2C products.

AI-native strategist who drives 0-to-1 innovation through Generative AI, LLMs, ML/AI, RAG, and agentic systems, translating complex capabilities into client-ready solutions as a trusted pre-sales partner. Champions data security and governance alongside rigorous engineering processes that manage technical debt while sustaining high delivery velocity. A leader of leaders mentoring senior managers, establishing structured hiring and career paths, and leading distributed, remote teams. Microsoft Azure MVP and inspirational communicator aligning engineers, product managers, and executive stakeholders.

CORE LEADERSHIP COMPETENCIES

Strategy & Execution: Platform Strategy & Modernization, API-First Architecture, Build vs Buy Decisions, Technology Roadmap, Strategic Goal Translation, OKRs / KPIs, Budget & Resource Management, Executive & Stakeholder Communication

Scale & Reliability: Scalable Engineering Foundations, High-Scale & High-Availability Systems, High-Growth Environments, 99.9%+ Uptime, Data Security & Governance, Technical Debt Management, Agile Processes, Resource Optimization

Innovation & People: 0-to-1 Innovation, AI-Driven Development, Org Design & Scaling, Leader of Leaders, Mentoring Senior Managers, Structured Hiring & Career Pathing, Distributed & Remote Teams

TECHNICAL SKILLS

Architecture: Microservices, API-First Platforms, Distributed & Cloud-Native Systems, Event-Driven Architecture, REST APIs, GraphQL, OAuth 2.0, SOLID, Design Patterns, TDD / BDD

Cloud & DevOps: Microsoft Azure, AWS, GCP, Kubernetes, Docker, Terraform, Bicep, Azure DevOps, Jenkins, TeamCity, CI/CD Pipelines, SonarQube, OpsGenie

AI & Emerging Tech: Generative AI, LLMs, LLM Integration, RAG, AI Agents, Agentic AI, Machine Learning (ML/AI), Prompt Engineering, Responsible AI, GitHub Copilot, Cursor AI, ChatGPT, Claude

Programming & Data Stores: .NET / .NET Core, C#, Golang, Python, Java, JavaScript, TypeScript, Node.js, NestJS, React.js; SQL Server, PostgreSQL, MongoDB, Cosmos DB, Snowflake, Kafka, RabbitMQ

Observability: New Relic, ELK Stack, Prometheus, Grafana, Application Insights

PROFESSIONAL EXPERIENCE

iOL (Illusion Online) - Dubai | Travel & Fintech

Multi-currency travel wallet (Wallet 2.0) and API-first payment orchestration platform (iOL Pay) driving 50%+ of company revenue across 6 countries.

Senior Engineering Manager & India Engineering Head

Sep 2025 - Present

- Lead 35+ engineers across 6 countries; own the technical roadmap and architecture for an API-first, microservices platform (Wallet 2.0, iOL Pay) on .NET Core, Golang, Azure, GCP, and PostgreSQL, evolving the product into a partner-connected platform.
- Architected mission-critical fintech integrations (Checkout.com, Connex Pay, WEX, Citi, Revolut, Trip Link) enabling B2B and B2B2C checkout, supplier settlement, and virtual card issuance; drove PCI-DSS certification end-to-end, embedding data security and audit readiness into core delivery.
- Institutionalized AI-native engineering: AI PR Review and Page Summary agents (review time -50%), an Azure DevOps Daily Digest agent (2+ hours/day saved), and a unified observability dashboard cutting incident investigation by 60%; automated Teams alerting that reduced client-facing tickets from 5,000+ to under 100.
- Championed AI adoption (Claude, Cursor AI, GitHub Copilot) for a 25% productivity uplift and redesigned competency-based hiring for a 35% efficiency gain; mentored leads and built career paths across distributed, remote teams.

Delhivery - India | Logistics & Supply Chain

India's leading logistics unicorn; scaled high-throughput payout, slot booking, and attendance platforms.

Senior Engineering Manager

Nov 2024 - Sep 2025

- Directed 30+ engineers and 3 leads to scale payout, slot, and attendance services, improving scalability and availability by 40%; launched ACKO integration and slot templating, raising payout accuracy by 30% and reducing manual escalations by 50%.
- Reduced CI/CD pipeline execution time by 45% through build optimization, containerization, and parallel execution (GitHub Actions, Azure Pipelines); led Python 3.11 upgrade and infrastructure right-sizing for 20% cost savings while sustaining 99.98% uptime via proactive Kibana, Slack, and OpsGenie observability.

Novo - United States | Fintech

Cards, lending, payments, and core banking infrastructure contributing to 95% of \$50M annual revenue.

Group Engineering Manager / Director of Engineering

Jan 2023 - Nov 2024

- Directed an 80+ member organization and 4 managers across cards, lending, payments, and rails, contributing to 95% of Novo's \$50M annual revenue; owned the full technical roadmap for core banking and payment infrastructure at a 99.99% uptime SLA.
- Delivered end-to-end debit and credit card features (Taktile, Lithic, Sardine, PPP, Twilio) reducing time-to-market by 25%; architected a money movement platform on Golang, PostgreSQL, and AWS with Python-based A/B testing and data-driven decisioning.
- Championed Shopify and Stripe integration boosting user engagement by 212%; integrated Wise, Mitek, and Wausau, improving customer satisfaction by 20% and onboarding by 35%; led DevOps transformation from monthly to daily deployments, cutting release time by 60%.
- Revamped onboarding (satisfaction 42% to 78%, churn -30%), established career ladders and L&D programs, and drove quarterly OKR reviews; scaled the team by 35% in 12 months through structured hiring and mentorship while maintaining delivery velocity.

Bold - United States | E-commerce & Shopify Apps

Payment services engineering and .NET Core platform modernization across 5 critical commerce services.

Engineering Manager

Apr 2021 - Jan 2023

- Led a 15+ member team architecting 5 critical payment services (risk, subscriptions, notifications) on .NET Core, Java, React.js, Azure, and SQL; delivered a .NET to .NET Core platform migration and integrated Adyen, Stripe, and Shopify gateways.
- Established quality and delivery rigor through SonarQube gates, New Relic observability, and structured code review, achieving 99.95% availability and cutting MTTR by 40%; mentored engineers, advancing 3 to senior roles.

Stryker, IGT, Fiserv, Nagarro, Xebia Group (McKinsey)

Enterprise engineering leadership across HealthTech, FinTech, gaming, e-commerce, and McKinsey consulting.

Senior Technical Lead / Technical Lead

Jun 2010 - Apr 2021

- At Stryker (HealthTech): led 10+ engineers on enterprise .NET Core, React.js, and Azure applications; built a COVID-19 risk assessment tool reducing clinical triage time by 40% and a knee-implant surgery visualization POC (Unity 3D, Blender) adopted across surgical teams.
- At Xebia Group (McKinsey): architected microservices platforms (.NET Core, Kubernetes, SQL Server) for McKinsey & Company, reducing latency by 50% and deployment times by 55% across Fiserv, IGT, and Nagarro engagements. Microsoft Certified Trainer (2018-2019) and author of 100+ technical articles.

CERTIFICATIONS & EDUCATION

- AI-100: Microsoft Azure AI Associate (2021); AZ-900: Azure Fundamentals (2020); Exam 532: Developing Azure Solutions (2018)
- MCSD: App Builder (2018); MCSA: Web Applications (2018); Microsoft Certified Trainer (2018-2019)
- B.Tech, Computer Science - Guru Gobind Singh Indraprastha University (GGSIPU), Delhi (2010)

AWARDS & COMMUNITY LEADERSHIP

- Microsoft Azure MVP: collaborated with Microsoft product teams, represented Microsoft at global conferences, and drove awareness through 100+ published articles.
- Organized Global DevOps Camp 2018 (Delhi) and 30+ technical conferences; active speaker on Azure, AI-driven development, and DevOps; author of "Understanding Azure: A Beginner's Guide."
- Founder of the Microsoft & Cloud Enthusiasts Meetup, a community of 500+ engineers across India's technology ecosystem.
